

VERSITY CLAIMS MORE THAN 4.5 MILLION EUROS IN DAMAGES AGAINST CAPITAL SYSTÈME INVESTISSEMENTS SA

Versity SA, listed on **Euronext Access+ (MLVSY/FR0014003I41)** and specializing in **3D and Web3** solutions for real estate, has filed a lawsuit against **Capital Système Investissements SA**, chaired by **Mr. Gilles-Emmanuel Trutat**, before the **Paris Commercial Court** and is claiming more than **4.5 million euros in damages**, particularly for failing to meet its financial commitments.

Nicolas Fratini, Frédéric Ibanez and Claude Li, Versity's management team.

Since **2022**, Capital Système Investissements SA had committed to providing up to **8 million euros** as part of two bond issues. Despite its commitments and promises, Capital Système Investissements ultimately disbursed only **1.75 million euros**.

Furthermore, **Versity suspects that Capital Système Investissements SA**, together with other parties, has engaged in unfair practices aimed at destabilizing its governance and shareholder structure.

As a result, beyond the current legal action against **Capital Système Investissements SA**, Versity is exploring all further actions against all stakeholders involved in these actions to **fully protect its rights**.

Frédéric Ibanez, President of Versity, stated:

"In addition to the funds that were never provided, these unfair actions have destabilized our development plan. However, Versity is built on solid fundamentals with high added value. We will spare no effort to defend the interests of Versity and its shareholders to ensure the success of our development and commercialization plan."

In the interest of transparency and to clarify the allegations against Capital Système Investissements SA we are making the lawsuit document available.
